🎓 Education

Computers and Information, *Zagazig University*   Zagazig, Egypt
I am in my second year of college now (2022 - present)
GPA : 3.61

📁 Projects

Clinic System ⤢
This project I worked with my team
so, it developed my Team work skills
Look at project description

Smart Factory ⤢
Using Data Structures : Linked List (with different implementation) & Queue & Stack

Social Media Tracker ⤢
Using C++ to track posts , comments, and shares
for each user on a social media platform.
Users stored in a Hash Table and every node has an AVL Tree

🧠 Skills

C++	OOP
Data Structures	Algorithms
C#	Problem Solving
Team Work	English

🧩 About Me

Hey there! I'm a second-year computer science student, and I've got the basics down solid.
I've dived into object-oriented programming (OOP), getting a good grip on designing and
structuring code. Problem-solving is my thing I love tackling challenges and finding solutions.
Now, when it comes to data structures, I've got that covered too. I've learned how to organize
and store data efficiently to make my programs run smoothly. But you know what's awesome?
I'm not stopping there. I'm all about self-development, constantly exploring new projects and
technologies. The world of computer science is my playground, and I'm ready for whatever
comes my way!
